iGUESS training
exploring my city potential and building CO2 emissions scenarios
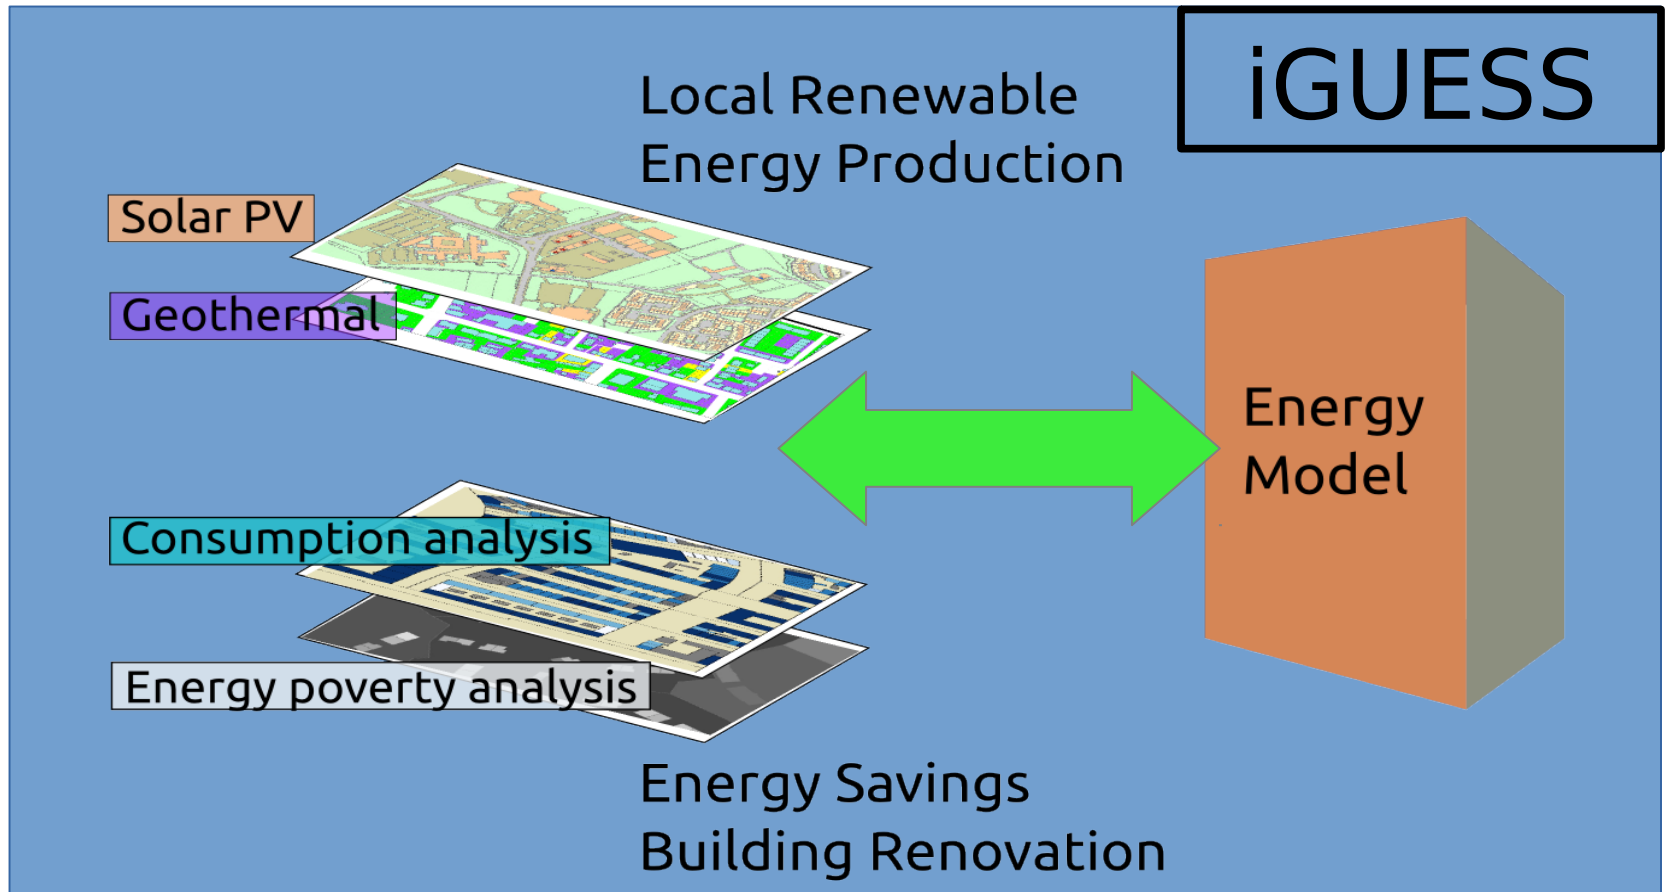

Gent, June 2014

R. Martins, O. Baume, L. de Sousa, C. Eykamp, C. Braun, U. Leopold,
J. Matshazi, A. Mastrucci

What am I going to learn?

➡️ 1 tool to discover   ➡️ 6 training exercises

iGUESS

Local Renewable Energy Production

Solar PV

Geothermal

Consumption analysis

Energy poverty analysis

Energy Savings Building Renovation

Energy Model

The documents

iGUESS

1. I explore the published content of iGUESS as an unregistered user.

2. I register in iGUESS as a new user.

3. I register a new dataset in iGUESS and I tag it for a module.

4. I compute the PV potential for a neighbourhood in Rotterdam.

5. I aggregate the results of the PV potential module to the block level.

6. I explore the GHG Tool and I create a new scenario.
